

Your place of connections

We make it easy for Investors to receive multi-media content created and published directly by four unique, but inter-related groups: public companies, private companies, asset managers, and other investors. As important, we enable the investor to connect and have their voice heard.

Senasen is intuitive and easy to use on any device. The uniform format of user profiles makes it easy to find and access the information you need, whenever and wherever you need it. Unlike aggregation sites, all content on Senasen is published directly by companies, asset managers, and investors.

Whether you're a private investor, intermediary or professional investor - trawling through search engines, hundreds of individual websites of differing designs, and social media platforms to obtain content can be a significant burden. Our platform was designed to make it easier to find the businesses, people and information you need - while giving you control over who you follow, engage with and read about.

Features and benefits

Access information easily with a standardised & uniform design

Search, and follow who interests you

Receive any updates from who you are following via your personal newsfeed

Watch corporate and product videos; listen to podcasts, read documents, comments, Q&A's
